ABOUT ME

I think of myself as an optimizer. I'm constantly looking at repetitive tasks, at work or in my own life, and figuring out how to do them better. I'm competitive by nature, and a clear goal brings out my best, which is why I've always been drawn to competitions and hard problems.

EXPERIENCE

Backend Developer

Verifarma

Argentina

Sep 2025 -- Sep 2026

- Redesigned serial-number generation algorithms for pharmaceutical traceability, and built supply-chain optimization features that raised packaging throughput.

Software Developer Intern

ATC Sports

Remote

Mar 2023 -- Feb 2024

- Backend services and internal tools in TypeScript/Node.js, with automated tests (TDD) to catch regressions before deployment.

Freelance Software Engineer

Self-Employed

Remote

2021 -- 2026

- Freelance client work, notably backend integrations connecting e-commerce ERPs to an MCP-based AI analytics layer (Numetri), plus internal tools for retail, travel, and non-profit clients.

VOLUNTEER

Community Director & National Treasurer

Habonim Dror Argentina

Argentina

2018 -- 2025

- Led logistics/budgets for national camps (300+ participants); delivered teen leadership programs.

ACHIEVEMENTS

1st Place, Mercado Libre Warehouse Optimization Challenge (Oct 2025): Algorithmic warehouse logistics competition (Java, IBM CPLEX LP solver); invited to present the solution at SBPO 2025, Brazil.

1st Place, Investigathon -- Graph Theory Research (Dec 2025): Formal paper solving an original graph-theory problem; awarded a monetary prize and presented to 200+ attendees.

PROJECTS

Projects: Profitable algorithmic trading system for Polymarket (Rust); web-based games – Codenames, Azul (MCTS AI), Snake (Google Play); competitive programming library (C++).

EDUCATION

University of Buenos Aires, Argentina

M.S. Computer Science (in progress: thesis remaining)

Jul 2025 -- Dec 2026 (expected)

Thesis: efficient algorithm for the $K_r - e$ -free sandwich problem in graphs (advisor: Min Chih Lin).

University of Buenos Aires, Argentina

B.S. Computer Science

2021 -- 2025

Cambridge University, UK

C2 Proficiency Certificate in English

2017

SKILLS

Languages: C++, Python, JavaScript, Java, C#, Rust

Backend & Systems: .NET/C#, Node.js, Linux, Bash, Docker, SQL, concurrent programming

Algorithms & Math: Competitive programming, graph theory, optimization, linear algebra

Codeforces: 800+ problems solved (peak Candidate Master), codeforces.com/profile/NatanVek
